## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of claims 1-6 in Paper No. 6 received October 6, 2003 is acknowledged. The traversal is on the ground(s) that no two way distinctness has not been provided and separate status in the art is improper. This is not found persuasive because the Group II and Group III are both subcombinations of Group I. Also, the Group II interactive computer program comprising calculating modules are not required for Group III. Applicant's comments regarding the classification are noted, but are not agreed with. Finally, Applicant's Amendment eliminates the need for the species requirement. Thus, claim 6 remains bundled with claims 1-5.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 7-18 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3627

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al., US 5,862,223 in view of Jack P. Friedman's "Talking with accountants about income-producing real estate" (hereafter "Friedman").

Walker discloses an automated data integrity auditing database system, e.g. 295, for real estate, e.g. 115, comprising transaction information that may later be analyzed by a firm, e.g. expert or user. Walker does not specifically disclose the concept of net operating income (NOI).

Friedman discloses the concept of NOI associated with real estate.

To have provided part of the data to comprise NOI for Walker would have been obvious in view of Friedman. Doing such would incorporate a common knowledge and extremely well known criteria of NOI reports used in evaluating a business endeavor.

5. Further pertinent references of interest are noted on the attached PTO-892.
